Experience

Concept Dash

SOFTWARE ENGINEER

Dec 2023 - Present

- Led the frontend team in developing key product features, including user authentication, profile management, task and invoice creation, and employee management.
- Designed & implemented interactive dashboards for data visualization with filtering capabilities, providing insights through dynamic graphs, reducing data interpretation time by 40%.
- Developed a proposal generator feature enabling users to create documents through a step-by-step selection process, enhancing document creation efficiency and accuracy from 85% to 98%.

Skillmine Technology

SOFTWARE DEVELOPER

Aug 2021 - Nov 2023

- Led frontend development for multiple high-profile clients in fintech & healthcare sectors.
- Mentored junior developers and conducted code reviews to ensure code quality and best practices.
- Implemented responsive designs and optimized performance across various web applications.

Key Client Projects

Ecofy

May 2023 - Nov 2023

- Led the development of a modern, mobile-first UI, focusing on delivering an intuitive user interface.
- Developed the UI of the customer portal for availing loans and making EMI payments.
- Integrated critical payment infrastructure for EMI payments with Cashfree.

Sterling Accuris Diagnostics

Dec 2022 - May 2023

- Developed the UI of the patient portal and integrated APIs **using NextJS**.
- Created the homepage UI and pathology test details page UI of mobile app using Crafter CMS.
- Refactored the codebase for the web & mobile UI improving performance and maintainability.

American Express

June 2022 - Dec 2022

- Implemented and secured the enrolment validation process of the highly sensitive customer information application, handling state-management using Redux.
- Wrote unit-test cases for React componenets **using React Testing Library**.

Zestmoney

Aug 2021 - June 2022

- Developed the UI of the widget of **Zestmoney, used by 500+ merchants and visited by millions of users** on e-commerce sites (like boAt and Pepe Jeans) to avail their EMI.
- Re-architected the project for better code-base and also optimizing the load time for websites.
